#### About Us:

SimplexHealth® has become known as a supplier of accurate and reliable water screening tests. We are the exclusive distributor for Watersafe® Water Test Kits in Europe; as well as SimplexHealth® water testing kits and SimplexHealth® pH Test Strips worldwide. We also sell a range of additional products such as pH drops and blender shaker bottles.

The water testing kits have proven popular because they are ideal for industrial & domestic use, easy to use and safe. New & inexperienced users can be assured of the quality as the results have been laboratory tested. Our products are used widely by individuals as well as businesses in different industries.

Our range covers many applications, including water testing kits for private water supplies, water improvement systems (ie reverse osmosis, water filters), water softeners, sanitising purposes, as well as testing of water quality in water tanks and pools & spas.
